

QCM – Flow Cell Holder CH01

Product description

The **flow cell holder** (CH01) is required for assembling the two parts of the Flow Through Liquid Cell (separately available) and to connect the electronic contact of the QCM crystal electrodes to a male BNC port. The mounting screw for fixation of the cell is designed to have direct optical access to the QCM crystal surface in the liquid cell.

Technical data	
Compatibility	LC01 Flow through liquid cell
Electronic connector	male BNC (adapter to SMB optional available)
