

V. DIPLOMA THESIS - DISSERTATIONS

Diplomarbeiten – Dissertationen

1. Diploma thesis in preparation / *Laufende Diplomarbeiten*

Pinar FRANK Setup and operate the FTIR-ATR spectroscopy lab.in normal and step scan mode and ATR-FTIR Study of organic semiconductor / organic dielectric interface

2. Doctoral thesis in preparation / *Laufende Dissertationen*

Martin EGGINGER Using foamed organic dielectrics and organic semiconductors in organic FET's, diodes, resistors

Robert KOEPPE Graded bandgap energy transfer cascades for photovoltaic applications

Anita FUCHSBAUER Rare Earth Emission obtained by using organic photoluminescent systems

Philipp STADLER Fabrication & Characterization of 2-D Charge Carrier Density in Organic Semiconductor Heterostructures

4. Doctoral thesis completed / *abgeschlossene Dissertationen*

Christoph LUNGENSCHMIED Injection and recombination phenomena in organic semiconductor thin film devices
