

V. DIPLOMA THESIS – DISSERTATIONS

Diplomarbeiten – Dissertationen

1. Doctoral thesis in preparation / *Laufende Dissertationen*

Mateusz BEDNORZ	Studies of silicon\organic based hybrid infrared photodetectors
Jacek GASIOROWSKI	Electrochemical doping of organic semiconductor heterojunction
Eric GLOWACKI	Spectroscopy on Organic Solar Cells
Engelbert PORTENKIRCHNER	Photoinduced Electron Transfer from Organic Semiconductors onto Redox Mediators for CO ₂ Reduction

2. Doctoral thesis completed / *abgeschlossene Dissertationen*

Philipp STADLER	Interfacial effects in organic semiconductor heterojunctions
-----------------	--

3. Diploma thesis completed / *abgeschlossene Diplomarbeit*

Doris SINWEL	Electrical Characterization of Vertical Organic Transistors
Sandra KOGLER	Charge Modulation Spectroscopy
Stefanie SCHLAGER	Diodes with organic Schottky junctions
Stefan KRANER	Measurement of charge carrier mobility and charge carrier concentration of organic photovoltaic diodes under in situ light soaking conditions and varying temperatures
