How to make your AI ethics-proof? A primer

Ethics is the new blockchain: No "AI" conference without an ethics panel or even an entire ethics track any more, the number of published ethics guidelines stands north of 100 now, and every month a new company announces that it will help you make your AI ethical. Why the hype? Do you need to care? And if so, how?

Hosts: Dr. Johannes Kofler
Institute for Machine Learning & LIT AI Lab

Univ.-Prof. Dr. Uli Meyer
Institute of Sociology
