

INVITATION TO THE LECTURE SERIES ARTIFICIAL INTELLIGENCE

Time: Tuesday December 10, 2019, 14:00 h

Place: Lecture Hall 1 (HS 1)

Gerfried Stocker

Ars Electronica Linz

Artistic Perspectives on Artificial Intelligence

Artificial intelligence in all its complexity has become a central part of our daily lives. Ars Electronica Linz, which has been analyzing and commenting on the Digital Revolution and its impact on society, science and art since 1979, is currently dedicating two exhibitions to the topic of artificial intelligence: "Understanding AI" and "AlxMusic".

In this lecture, Gerfried Stocker, the Artistic and Managing Director of Ars Electronica, illuminates the subject of artificial intelligence from an artistic point of view. He discusses how important it is to take into account a variety of disciplines for the complex issues around artificial intelligence and he shows exemplary projects where artificial intelligence is represented both as a theme of the work and as a technology for its realization.

With museum, Prix, Futurelab and Festival, the Ars Electronica is a worldwide renowned and unique platform for art, technology and society. From 9 to 13 September 2020, the campus of the Johannes Kepler University will be the hotspot of the Ars Electronica Festival for the first time!

Hosts: Dr. Johannes Kofler
Institute for Machine Learning & LIT AI Lab

Univ.-Prof. Dr. Martina Mara
Robopsychology Lab, LIT
