

# LIT LECTURES - SCIENCE IN A NUTSHELL

18 May 2022

13.00

Forum, LIT Open Innovation Center, JKU

## Con Espressione! An Update

---

This will be about (in alphabetical order)  
AI, computing, machine learning, music.  
You will listen to and describe Mozart, compare your perceptions to  
that of a machine, and see some "co-expressively" played Brahms in  
the Vienna Musikverein.  
Along the way, you will hear a bit about two big ERC projects.

**Gerhard Widmer**  
(Institute of Computational Perception and LIT | AI Lab)

## Contract or code — Are we heading to anarchy in the IoT?

---

With the emergence of IoT products, the parties to a contract no  
longer need a court to enforce their rights. Instead of bringing a  
claim, sellers and landlords will, upon not receiving payment,  
simply render the goods provided unusable. While avoiding legal  
proceedings can minimise externalities, the need for protecting the  
weaker party may require the judicial system to intervene.

**Lukas Klever**  
(LIT / Institute of Civil Law)

Coffee & Cakes provided.  
Please register latest by  
11 May at [jku.at/vas](https://jku.at/vas)

Upcoming LIT Lecture:  
16 November 2022 | 13.00
