# Operating instructions for user 1401

Important notes for users:

- The default factory code of the lock is 0-0-0-0.
- Be sure to change the factory code to your personal code.
- Remember your personal code or write it down if necessary.
- You can change your personal code as often as you like
- To enter or change the code, the lock must always be in a horizontal position.
- When the lock is opened, the code displayed is automatically changed to automatically blurred to 0-0-0-0
- The code does not need to be re-entered to close the lock.
- If you have forgotten or lost your personal code, please contact the administrator of your locker, who can reset your lock to factory settings, so that you can programme in a new code.
- Make sure that objects in the cabinet do not interfere with the rotation of the locking bolt.

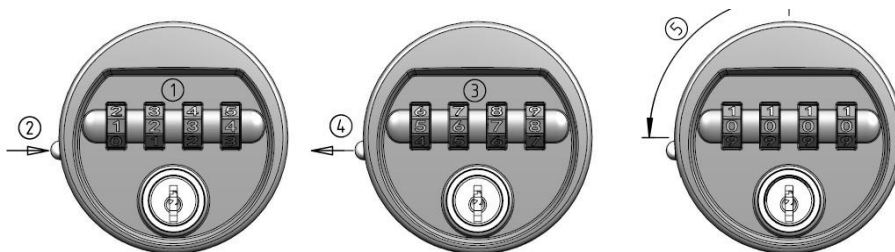

Padlock ------------------------------> open--------------------------> close

| 1. Enter valid code (if programmed) | 2. Turn the lock as possible (code blurred to 0-0-0-0) | 3. Turn back the lock until it engages |

Program / change personal code

| 1. Enter valid code (factory code 0-0-0-0)
 2. Press the code button and hold | 3. Enter new code
 4. Release the code button (code is stored, remember it well!) | 5. Open and close lock (code blurred to 0-0-0-0) |
