

ARE YOU AN INVENTOR?

Essentials on employment inventions & patenting

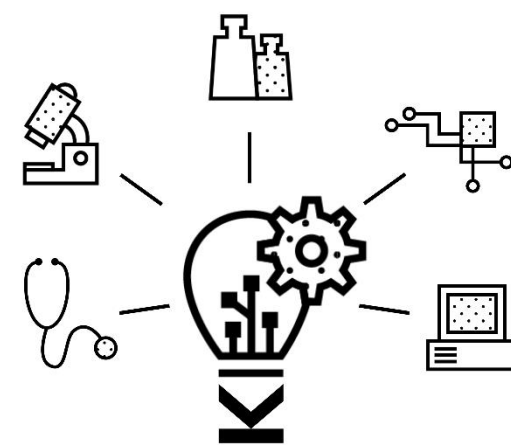

Are you a professor or employee at JKU, perhaps working on your master's thesis or dissertation, and have developed a brilliant, problem-solving idea? Could your idea even qualify as an invention? If so, it may be patentable! As JKU's Intellectual Property Rights Management (IPR) we inform you about your rights and responsibilities as an inventor. We present our services and show you the path to the patent.

Afterwards we can have some snacks and drinks and answer all your remaining questions.

Kindly sign up in advance by November, 19!
