

The CRISPR Journal (New in 2018) - The CRISPR Journal is the only journal dedicated to publishing advances across the wide range of topics and fields impacted by the discovery of this revolutionary gene editing technology – microbiology, immunology, cell biology, genomics, drug discovery, neuroscience, plant biology, and much more. In the recent history of CRISPR, many seminal discoveries were made by researchers in western Europe, including Emmanuelle Charpentier (Max Planck Berlin) and Francisco Mojica (Alicante). They are both on our editorial board, along with leading genome editing scientists at ETH Zurich, Germany, and the UK. With the surge of interest in the broader societal ramifications of genome editing, The CRISPR Journal provides readers with critical, timely information on a range of topics including ethical and regulatory issues that complement the journal's expansive coverage of basic and applied research. Autism in Adulthood: Knowledge, Practice, and Policy (New for 2019) - Autism in Adulthood is the home for research and scholarship on the most pressing issues affecting adults on the autism spectrum, from emerging adulthood to later life. [Read more...](#)

Bioelectricity (New for 2019) - The only peer-reviewed journal dedicated to the field of bioelectricity, publishing ground-breaking research and advances in a multitude of related disciplines. [Read more...](#)

Cannabis and Cannabinoid Research - The premier peer-reviewed journal dedicated to the scientific, medical, and psychosocial exploration of clinical cannabis, cannabinoids, and the endocannabinoid system. [Read more...](#)

Applied In Vitro Toxicology is a peer-reviewed journal providing the latest research on the application of alternative *in vitro* testing methods for predicting adverse effects in the pharmaceutical, chemical, and personal care industries. [Read more...](#)

3D Printing and Additive Manufacturing - The only peer-reviewed journal focused on the rapidly moving field of 3D printing and related technologies, providing comprehensive coverage of academic research and industrial and commercial developments that have applications in medicine, education, food, and architecture. [Read More...](#)

LGBT Health - The premier peer-reviewed journal dedicated to promoting optimal healthcare for all sexual and gender minority persons worldwide. The Journal focuses specifically on health while maintaining sufficient breadth to address policy, legislative, and education and training issues relevant to the provision of healthcare and health outcomes. [Read More...](#)

Soft Robotics - Soft Robotics (SoRo) is the #1-ranked robotics journal, publishing world-class peer-reviewed research on the emerging technologies and developments of soft and deformable robots, including coverage of flexible electronics, materials science, computer science, and biomechanics. The Journal breaks new ground as the first to answer the urgent need for research on robotic technology that can safely interact with living systems and function in complex natural or human-built environments. [Read More...](#)

Violence and Gender - is the only peer-reviewed journal focusing on the role of gender in the understanding, prediction, and prevention of acts of violence. The Journal is the international forum for the critical examination of biological, genetic, behavioral, psychological, racial, ethnic, and cultural factors as they relate to the gender of perpetrators of violence. Through peer-reviewed research, roundtable discussions, case studies, and other original content, **Violence and Gender** explores the

difficult issues that are vital to threat assessment and prevention of the epidemic of violence. [Read More...](#)

Clinical OMICs - Through its exclusive coverage of industry news, features, and analysis, Clinical OMICs keeps industry leaders current with critical translational research, tools, regulations, and applications impacting molecular pathology, the development of omics technologies and diagnostics, and the delivery of precision medicine. [Read More...](#)

Genetic Engineering & Biotechnology News - GEN is the flagship publication of Mary Ann Liebert, Inc. Launched in 1980, GEN was the first publication in this field and remains the key driver in the explosion of the industry, paving the way for the development of new technologies and applications, investment growth, and career opportunities. With over 37 years of publishing experience, GEN maintains unrivaled integrity, influence, and expertise that plays a pivotal role in driving the productivity and growth of the industry.
