

STUDENT WORKER FOR DIGITAL TRANSFORMATION PROJECT

8-12 hours/week

In the fields of:

INNOVATION, SUSTAINABILITY & QUALITY MANAGEMENT

The **Institute for Integrated Quality Design (IQD)**, **Johannes Kepler University (JKU) Linz, Austria**, conducts interdisciplinary research and teaching at the interface of Innovation, Quality and Sustainability Management (<http://www.jku.at/iqd>). Research and teaching is framed by the vision of a circular economy, a concept that proposes circular product design, processes and resource flows as strategies to overcome some of today's most pressing challenges, such as resource scarcity, dependence on fossil fuels, decreasing product quality (and respective lifetimes), waste and related environmental pollution.

Your tasks:

- Supporting a praxis-oriented research project on product life-cycle, digital transformation and Industry 4.0
- Supporting the team in administrative and organisational activities
- Optional: Maintaining and updating IQD's website content and supporting administration of IQD's devices (depending on background)

Your profile:

- Motivated student with good grades, enthusiasm for research and team spirit
- High performance and self-reliant working style
- Good german, english and MS Office skills
- Interest in information technologies, innovation and sustainability

We offer you:

- A young, innovative and international working team that fosters independence and creativity.
- Learning about research and praxis in a future-oriented project
- Flexible working hours and a professional working environment

To apply as student worker, please contact and send in your CV (with all relevant certificates and competences) to andres.alcayaga@jku.at. The selected candidate shall start in June/July 2017.

Andres Alcayaga, MSc

Research Associate

Institute for Integrated Quality Design (IQD)
